

## Participate in a study about the brain and cognition!

1-hour session. Win prizes or earn vouchers!  
Take part at home or university

We need people aged 31-75 to act as a comparison group for a study exploring how neurological illness affects attention, problem solving and decision-making

If you would like to learn more, scan the QR code below or fill in your details at the bottom and mail the form back to us in the self-addressed envelope!
